

116TH CONGRESS
2D SESSION

S. 4406

To amend the Federal Insecticide, Fungicide, and Rodenticide Act to fully protect the safety of children and the environment, to remove dangerous pesticides from use, and for other purposes.

IN THE SENATE OF THE UNITED STATES

AUGUST 4, 2020

Mr. UDALL (for himself, Ms. WARREN, Mr. BOOKER, and Mr. SANDERS) introduced the following bill; which was read twice and referred to the Committee on Agriculture, Nutrition, and Forestry

A BILL

To amend the Federal Insecticide, Fungicide, and Rodenticide Act to fully protect the safety of children and the environment, to remove dangerous pesticides from use, and for other purposes.

1 *Be it enacted by the Senate and House of Representa-*
2 *tives of the United States of America in Congress assembled,*

3 **SECTION 1. SHORT TITLE.**

4 This Act may be cited as the “Protect America’s Chil-
5 dren from Toxic Pesticides Act”.

6 **SEC. 2. FINDINGS.**

7 Congress finds that—

1 (1) the Environmental Protection Agency (re-
2 ferred to in this section as the “EPA”) regularly
3 fails to incorporate updated scientific understanding
4 to protect human health and the environment from
5 the harmful effects of pesticide products, as envi-
6 sioned by the Federal Insecticide, Fungicide, and
7 Rodenticide Act (7 U.S.C. 136 et seq.), resulting in
8 the use of billions of pounds of pesticides every year
9 that were approved based on outdated science;

10 (2) the United States lags behind the European
11 Union and other developed nations in protecting its
12 people and its environment from toxic chemicals, al-
13 lowing the use of 72 pesticides that have been
14 banned or are being phased out in the European
15 Union alone;

16 (3) the EPA registers nearly 65 percent of pes-
17 ticides through conditional registrations and fre-
18 quently waives requirements to extend the use of
19 conditional registrations prior to completion of com-
20 prehensive registration;

21 (4) the EPA permits the continued sale of po-
22 tentially dangerous stocks of pesticides after reg-
23 istration has been canceled or suspended;

24 (5) the EPA uses emergency exemptions to
25 keep pesticides on the market for years without un-

1 dergoing a comprehensive registration process that
2 would ensure the safe use of the pesticides;

3 (6) the EPA is prohibited from requiring the
4 disclosure of inert ingredients, even though inert in-
5 redients can account for 99 percent of a pesticide
6 product and include carcinogenic and toxic chemi-
7 cals;

8 (7) the International Agency for Research on
9 Cancer, the specialized cancer agency of the World
10 Health Organization, has assessed and ranked the
11 carcinogenicity of hundreds of pesticides to ensure
12 that the most up-to-date, rigorous scientific informa-
13 tion is used to inform the world of the risks of pes-
14 ticides;

15 (8) scientists have repeatedly linked exposure to
16 organophosphate pesticides to neurodevelopmental
17 damage in children;

18 (9) the United States Fish and Wildlife Service
19 and the National Marine Fisheries Service have de-
20 termined that organophosphate pesticides jeopardize
21 the survival of 97 percent of endangered species;

22 (10) neonicotinoid pesticides are contributing to
23 the rapid decline of pollinators and the deterioration
24 of pollinator health, including impaired foraging be-

1 havior and increased susceptibility to viruses, dis-
 2 eases, and parasites;

3 (11) exposure to paraquat—

4 (A) causes heart failure, kidney failure,
 5 liver failure, lung scarring, and damage to brain
 6 cells; and

7 (B) greatly increases the risk of developing
 8 Parkinson’s disease;

9 (12) local communities have been blocked by
 10 States from enacting pesticide restrictions to protect
 11 people and environment from toxic chemicals; and

12 (13) farmworkers are—

13 (A) disproportionately exposed to and
 14 harmed by pesticide use; and

15 (B) afforded inadequate safeguards and
 16 far less protection than industrial workers.

17 **SEC. 3. ENDING INDEFINITE DELAYS ON REVIEW OF DAN-**
 18 **GEROUS PESTICIDES.**

19 (a) DEFINITIONS.—

20 (1) IN GENERAL.—Section 2 of the Federal In-

21 the date of the previous registration, reregistra-
22 tion, or registration review determination, as
23 applicable; and

24 “(B) in compliance with all applicable laws
25 and regulations.

5 product may warrant designation as a dan-
6 gerous pesticide.

7 “(3) INITIAL FINDINGS.—

8 “(A) IN GENERAL.—Not later than 90
9 days after the receipt of a petition described in
